

why is it everytime something good comes along, there is somebody that wants to step on our rights. as a tax payer and a paying customer for a service, i'm mad that people want to limit what i can or can't hear on my radio. is it that FM stations are scared there going to start loosing money and listeners to XM? i think that's the reason this bill is being introduced. It's my right to choose whatever station i want to listen too, and hear whatever the station chooses to offer. as long as no laws are being broken, then let them broadcast whatever they want. all they are trying to do is help us with safety issues. If YOU want to choose to take away something that could keep us from getting injured or killed, then you have no regard for us as people and are only seeing the dollars signs!
